M	10/13*	3-4	Read pgs. 108-11	pgs 112-14: 1, 3, 7, 9, 10
T	10/14*		Review Chapter 3	
W	10/15*		Chapter 3 Test	

Extra Credit: Due on October 20

Interview someone who is currently in college (they may be a family member). Find out the following information:

- a) What has been the biggest change between high school and college?
- b) How have their study habits changed since high school?
- c) Have they taken any math courses in college? If so, what courses? How did these courses compare to high school math courses?
- d) What advice can they give you as you soon will prepare to enter college?

Write a paper (typed, double spaced) of at least one page about your interview. In the paper, be sure to mention the interviewee's year in college and their intended major field of study.
